

Nebular

Connect your vending world

CONNECT YOUR VENDING WORLD

Nebular

is the next generation solution to offer electronic payment and vending machine connectivity in a single product.

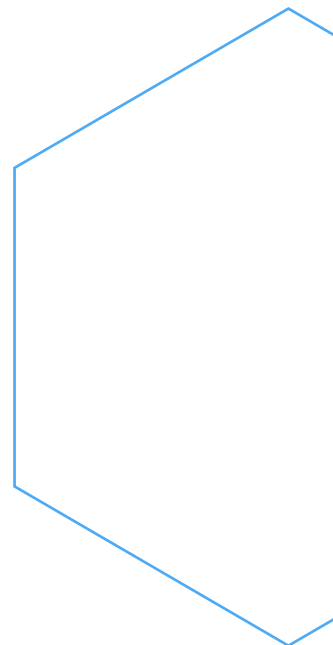

Nebular is completely integrated with your Coges payment system, without need for stand-alone peripherals and elaborate parameters configuration. You can rely on Coges' forty years of experience in payment systems for vending to effortlessly connect your entire machine fleet to the network.

Nebular is a connectivity solution designed keeping in mind the specific needs of the Italian vending market, in particular for the most widespread ERPs and payment systems and the most recent regulations concerning the Internet of Things and the related tax advantages:

Connecting your vending machines to your ERP through Nebular you will be facilitated to take advantage of the incentives provided for investments in Industry 4.0.

Nebular is already compatible with the most popular ERPs in the vending market, so you won't have to change the way you work or plan expensive investments.

Choosing Nebular you do not make a leap into the void. The most important vending operators in Europe already **trust** Coges for payment systems and connectivity solutions in their vending machines.

Our relationship with customers starts before the sales and doesn't end with it: the **commercial and technical support network** of Coges is here to offer you a continuous assistance service and to get the best for your business, in Italy and in the main European countries.

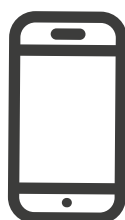

Nebular

YOU WILL NOT HAVE TO WORRY ABOUT THE SECURITY OF YOUR DATA

We will take care of it. All transmissions from the payment system to the cloud are encrypted and we rely on dedicated servers and connectivity networks among the safest and most efficient available worldwide.

AT THE HEART OF YOUR VENDING

Coges electronic credit systems are compatible with vending machines of any brand on the market. They can work with cash, cards, offline cashless and mobile.

Nebular

Nebular **brings the intelligence** of your payment systems to the cloud, offering you the connectivity you need to get the best from your vending machine fleet.

Integrated with your systems

With Nebular you can effortlessly integrate the data transmitted by your payment system into your ERP for **the most efficient organization.**

Nebular also includes a web portal and an app to allow you to access all your vending machines fleet **at any time from desktop or mobile.**

All your data at fingertips

Record your accounting data **by remote:** be always informed in real time about sales and incomes and optimize your business.

Using accurate accounting data, you can also customize the product mix in every VMC.

Turnkey connectivity

Nebular is offered with SIM and data plan included: payment system and cloud connection without complications from the first installation.

For a job that never stops

Intervene **quickly and effectively** whenever it is necessary. Nebular alerts you by email or message when your vending machine is down and provides diagnostics info, reducing casual inspection visits and avoiding lost sales.

Elimination of No vend condition leads to an increase of sales up to 15%.

New M2M modules

for a faster communication

2G and 4G hardware modules connected to your Coges payment system are **the fastest devices** to transmit data from your vending machine to the cloud in real time.
