Unica

Six tubes, three solutions, one target

experience + innovation

Unica

change-giver coin mechanism

Unica is a high precision 6 tubes change-giver coin mechanism designed to increase incomes in the management of vending machine thanks to the integrated cashless system, an accurate data audit unit and a new coin validation system. The programming of operating parameters is done with ease thanks to the new color graphic display and the integrated USB ports.

The best for cash and cashless

Unica coin mechanism is complete with cashless payment system, offering an integrated solution for both cash and cashless operation and noteworthy savings in terms of hardware, installation and maintenance costs. Integrated cashless provides, among the other advantages, accurate data audit and easy connection to additional payment systems (bill validator, credit card reader, NFC).

Unica change-giver coin mechanism is compatible with Coges proprietary cashless technologies MyKey and MyCard or with MIFARE Classic/DESFire and LEGIC cashless media (keys, cards, fobs...). You can choose the cashless reader which best suits your needs.

Made in Italy... for the world

Unica change-giver coin mechanism was entirely designed and made in Italy, but thanks to its high-precision technology and the vast database of coins it is perfectly compatible with many currencies other than the Euro.

Both firmware and functioning parameters can easily be updated using an USB pendrive, a Coges service key or by direct PC connection.

experience + innovation

Control your income...

Unica's integrated data recording unit permits a complete audit of all accounting data, including cash in tubes, cash in cashbox and a breakdown of sales by selection.

You can download any data on a USB pendrive and check them with a free Coges software or integrate them in your management software of choice.

...and keep it safe

Unica can read in real-time the actual number of coins in the tubes. In case of manual alterations of the quantity of coins during the opening of the tube group, Unica will report any inconsistencies on the display and exportable files.

The tube box is also locked by a patented electromagnet system to prevent unauthorised opening.

Watch with your eyes, program with your fingers

Unica is fitted with a color graphic display that lets you spot in a glance the number of coins in each tube and detailed messages about the operation of the change giver.

You can easily set the functioning parameters on the fly thanks to the user friendly icons menu and the scroll wheel, or by using a USB pendrive.

Unica change-giver coin mechanism is compatible with Pay4Vend app to pay with your smartphone at the vending machine. You will need to fit Unica with a small integrated module to start using all functionalities of Pay4Vend, including planning of promotions and loyalty schemes.

Additional features

- 6 tubes;
- 1 USB port and 1 micro-USB port;
- Distinct prices for cash and cashless;
- 4 price categories;
- Smart diagnostics on display;
- Fidelization bonuses;
- User groups;
- Time schedules;
- Automatic deposit payment;
- Separate single- and multi-sale management for cash and cashless;
- Enabling of self-coding for Location and Section Codes.

Security functionalities

- Separate operator codes;
- Cash and cashless transaction recordings;
- Maximum credit allowed on cashless media;
- Blacklist of stolen/lost cashless media;
- Maximum takings between two data recordings;
- Tube box lock.

Technical data

Dimensions (LxWxH):	138x80x380 mm
Weight:	1.7 Kg
Protocols:	Executive, MDB, BDV e RS232
Price lines:	100
Number of recognizable coins:	32
Max. diameter of coins:	32 mm
Thickness of coins:	1 - 3.2 mm
Tube height:	175 mm
