E.C.S. Dynamos

The small system to make your vending company great

experience + innovation

E.C.S. Dynamos system

E.C.S. Dynamos is the ideal payment system for vending machine with limited space. Offer to your customers the comfort to pay with a prepaid reloadable fob, taking advantage of every essential benefit of cashless: encashment in advance, multiple price lines programming and data audit, including from MDB-connected peripherals.

Small size, great versatility

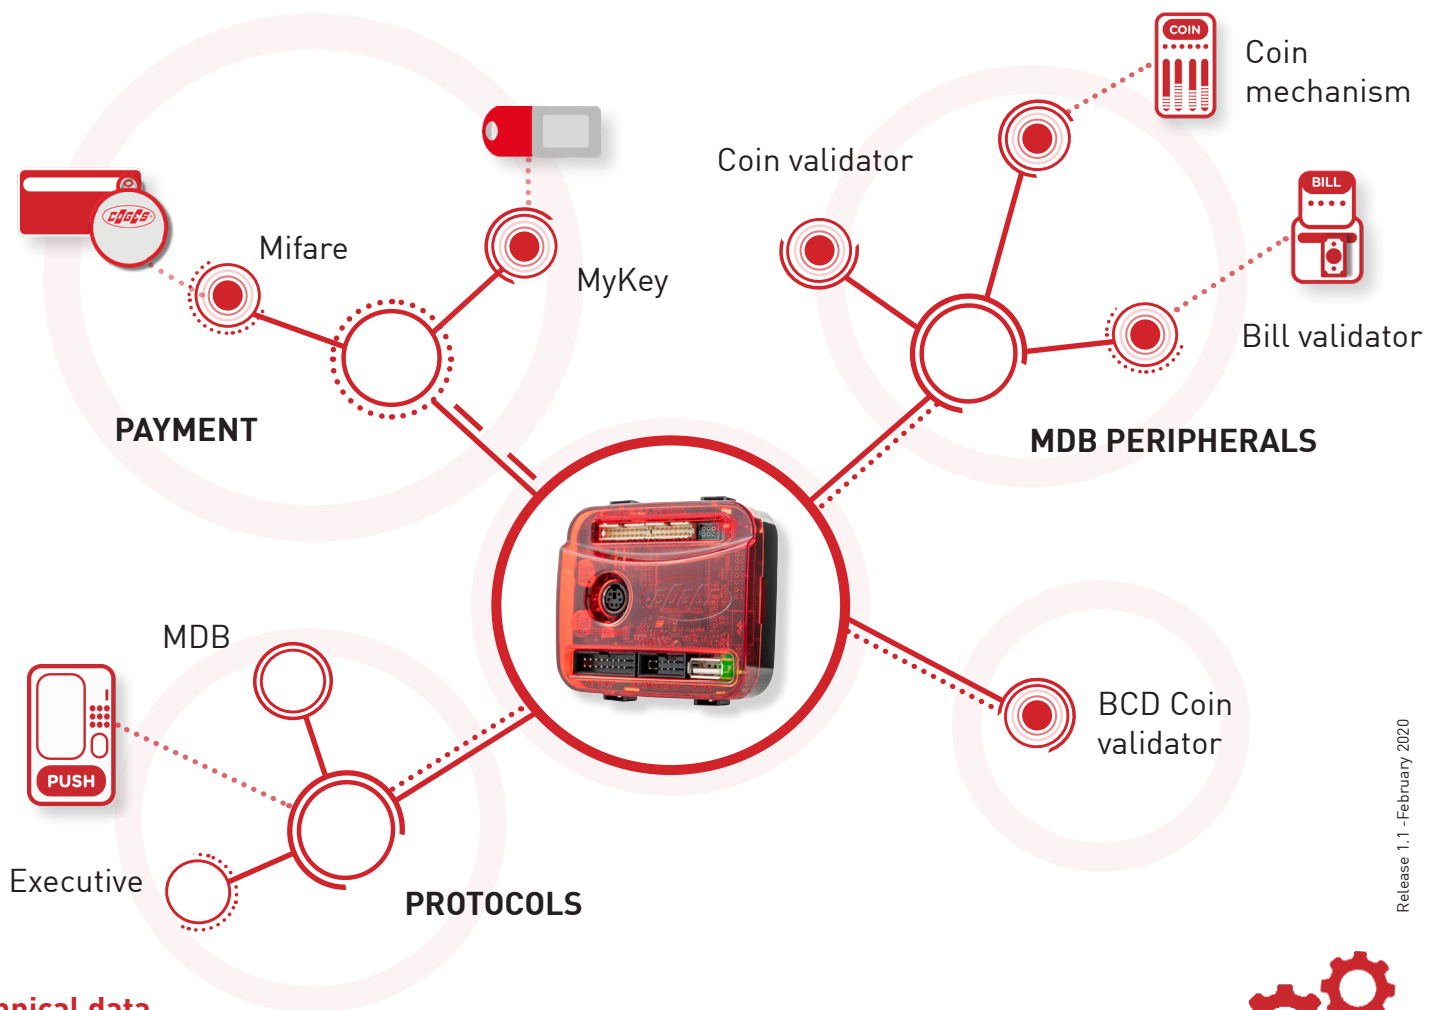

Coges experience has made it possible to reduce the size of this payment system to install the system on any type of vending machine, including table-top machines. Dynamos can connect to a change-giver coin mechanism, a banknote reader or a coin validator.

Compatible with MyKey or Mifare

Dynamos is available in a Mykey or a Mifare version, in order to be compatible with any type of support used in your locations.

Release 1.1 - February 2020
