PMT Nebular Pay Reader

*Enable the contactless payment
on your vending machines*

experience + innovation

PMT Nebular Pay Reader

The PMT Nebular Pay Credit card Reader is the ideal device to take to the vending the electronic payment with contactless credit and debit cards, physical or virtual, with the same simplicity of a key and cards reader.

Nebular Pay guarantees a user experience of immediate understanding: to make the payment it is enough to simply near the credit card or the smartphone to the reader:

- No PIN
- No buttons
- No app
- Amounts and messages only on the display of the vending machine

Furthermore, thanks to the extremely reduced sizes, Nebular Pay is easy to install on any vending machine, without occupying the hole for the Bill validator.

Nebular Pay permits to increase the takings of your management by offering the payment with credit card in all the locations where this service is required: banks, directional centres, offices and open locations such as universities, hospitals, airports and other places where there is a crowded passage.

Nebular connectivity included

The PMT Nebular Pay Reader requires the activation of Nebular connectivity service: in this way the connection is directly managed by Coges payment system and all Nebular services are enabled (remote refund, remote programming, remote price change and much more).

Nebular portal permits an integrated control of all the transactions in real time (cash, key, MIFARE, app, credit card) in order to always have under control your takings and the needs of your location.

The advantages of a complete service

Nebular Pay is compatible with all the credit and debit credit card circuits (Visa, Mastercard, VPay, Maestro...) and with the virtual credit card present on the smartphone (es. Google Pay, Apple Pay, Samsung Pay...), permitting thus a rapid transfer of the takings on the bank account of the Operator.

The PMT Nebular Pay reader is available both in the version for Coges Engine payment system and in the version for Unica Change-giver coin mechanism, permitting thus the use of the credit card for the recharge of MyKey or of a MIFARE support.
