

# **MASKS AND PPE**

**COGES SOLUTION**

experience + innovation

# NECESSARY HARDWARE

## UNICA

High precision 6-tube change-giver coin mechanism with integrated cashless

## COGES ENGINE PLUS

Multistandard payment system for vending machines

Some features described in this guide are available in the 2MB version of Coges Engine Plus system.

MYKEY MIFARE

Nebular is the Coges solution for the **CONNECTIVITY** of the vending machine.

# nebular

## TECHNICAL PORTAL

Nebular includes an online technical portal for the creation, modification and sending of prices and parameters and configurations remotely to the payment system.

## PRODUCT MANAGEMENT

Nebular allows you to manage the product database through an intuitive planogram and it records transactions in real time for each product.

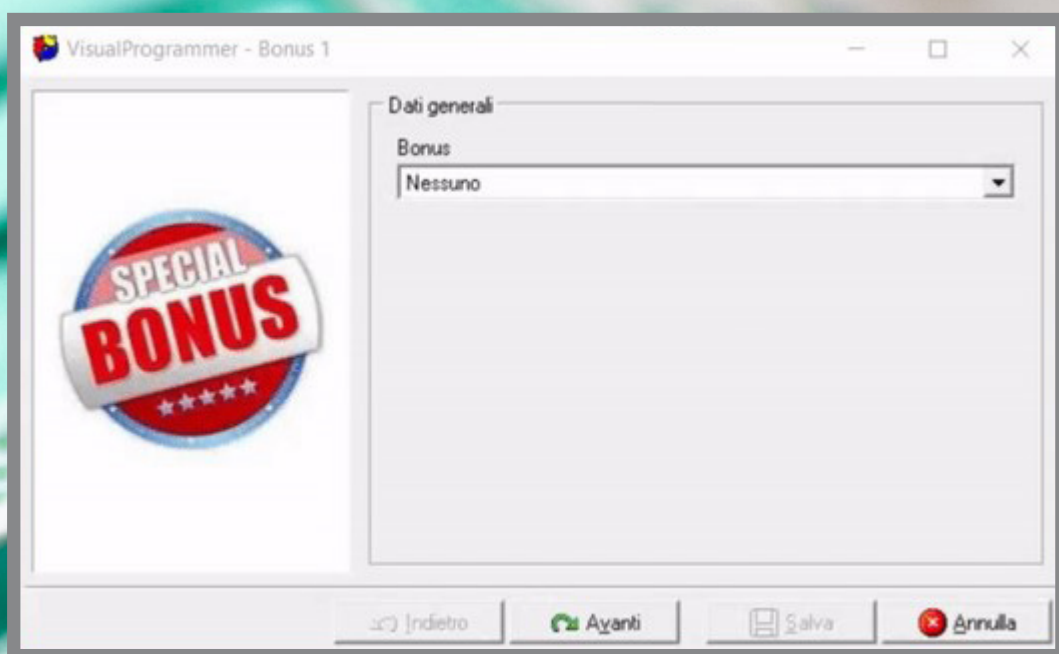

## KEYS MANAGEMENT

Nebular allows you to remotely view the credit of each key in real time, as well as the history of all sales and all top-ups made.

## CONTROLLED SALES

To allow the **FREE SUPPLY** of masks and other PPE, simply set up the payment system for **FREE SALES** on specific price lines.

## AVOID WASTE

It is possible to **LIMIT THE SUPPLY** to a certain number of masks per day or per week by setting the controlled sales on specific price lines.

Supply limits can also be **DIFFERENTIATED** by key / Mifare category, granting a greater number of PPE to particular categories of users.

For example, a maximum of 3 masks per day for factory workers and 2 masks for office employees, also using the same vending machine.

## TIME SCHEDULES

If the employer desires that the free distribution of masks occurs only during the working time, it is enough to set on the payment system some time schedules

The time schedules also allow you to **SET DIFFERENTIATED PRICES** (free / paid).

Controlled sale settings can be changed remotely via Nebular.

# STOCK MANAGEMENT

Nebular allows you to monitor the **STOCK OF PRODUCTS** in real time even from a distance.

# ALARMS

It is possible to set alarms to be alerted when the stock in storage approaches the minimum.

The alarm can be set for all products or only for specific price lines.

# SALES CONTROL

Nebular records for each sale:

- location and description of the vending machine
- the exact day and time of collection
- serial code of the key / Mifare token

The data can be viewed on the portal, integrated into the ERP or **EXPORTED** to share the report with the customer.

Nebular also helps to **REDUCE THE FREQUENCY AND DURATION OF TECHNICAL VISITS** to the vending machine: the system programming parameters can be updated remotely directly from the office.

## PURCHASE HISTORY FOR THE USER

The new MyKey allows the user to register on a **WEB SHOWCASE** dedicated to the Operator, framing the QR code printed on each key.

If the Operator uses Nebular, the registered user will have access to additional functions, such as:

- see his credit on key
- send comments / feedbacks
- contact the Operator directly from mobile or computer

In addition, the user will be able to view his **CONSUMPTION HISTORY** (only with connected VMCs), monitoring himself the number of masks and PPE taken.

# PRODUCT VAT MANAGEMENT

Nebular allows the setting of a differentiated VAT between the different price lines, in order to be able to sell food and non-food products at the same vending machine.
