

nebular

Nebular, integrated online service for connecting payment systems for vending

Nebular is a complete ecosystem of hardware, software and cloud to remotely control and manage your vending machine.

Nebular allows the **Vending Operator** to connect his **payment systems** online and view real-time accounting data such as: number and value of sales, type of products sold, payment method, sales trending and much more. **Nebular can also update the software and parameters of the vending machine**, view errors and idle machines and send refunds on MyKey cashless media.

Furthermore, Nebular **allows you to use products of Coges or third parties that require a connected payment system**, such as the **Nebular Pay** contactless credit card reader, payment apps such as **Satispay** and user registration on **cogeskey.com** portal, allowing the top up of the cashless media balance with a credit card by remote.

EXPERIENCE + INNOVATION

From cashless fobs to smart payment systems connected to the Cloud, for **45 years** we have been using our experience to transform your vending machines. **Coges** innovation allows the **evolution of payment systems** for vending in the digital tools of tomorrow.

MAXIMIZE TURNOVER BY ACCEPTING ALL PAYMENT METHODS

Accept the **full range of payment** options on your vending machine, from cash to MyKey and MIFARE, credit cards and mobile payment apps. Integrate third party payment solutions such as Satispay, Apple Pay and others.

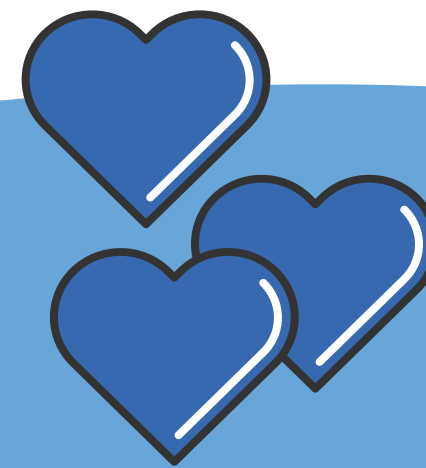

You will **never give up on a sale** for lack of choice!

ACHIEVE OPERATIONAL EXCELLENCE

Enhance your business intelligence with data audits, real-time sales report and credit transactions on cashless media. Optimize the product stock of your vending machine, plan routes and reduce filling and maintenance time.

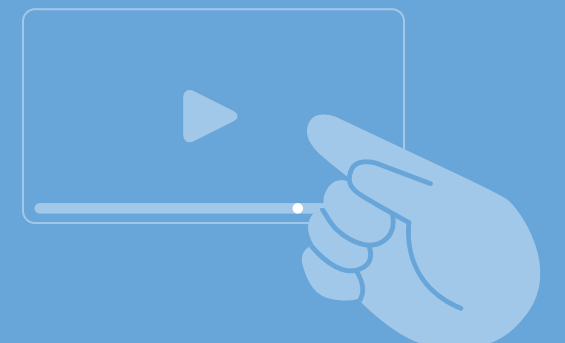

BE LOVED BY ALL YOUR CUSTOMERS

Engage all of your customers through unique features and data analytics, regardless of payment method. They will reward you with more purchases and positive feedback.

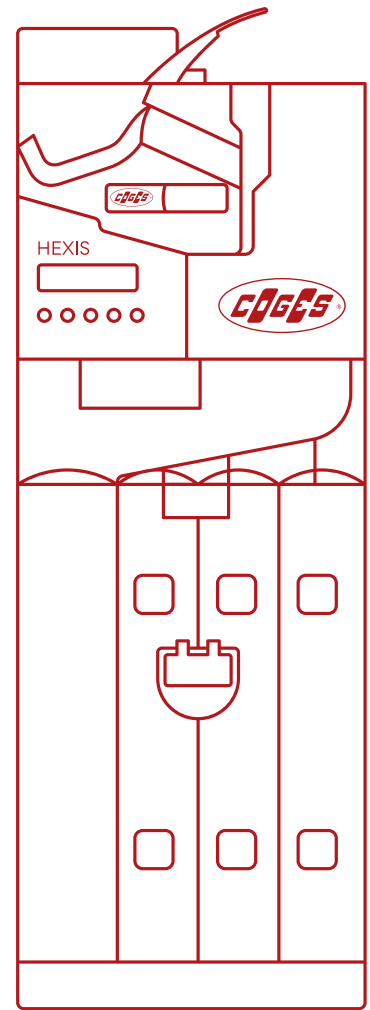

REDUCE DOWNTIMES AND TECHNICAL COSTS

Receive alerts when your machine is idle, reduce random inspection visits and **avoid lost sales**. Schedule remote updates of prices, configuration parameters, firmware and databases.

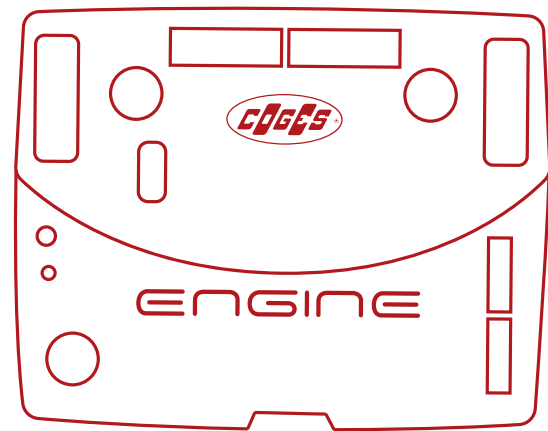

CONNECTED SOLUTIONS PORTFOLIO

From the MyKey virtual wallet to the Nebular Pay contactless card reader, from the Coges Engine system to the smart change-giver coin mechanisms up to the brand new Palladium Touch system with integrated modem, Coges offers the **ideal solution** designed together with you to meet your customers' needs and **grow your Vending business.**
